THE KÖNIG CIP

CLEAN IN PLACE SKID

INNOVATION FOR TODAY'S BREWERS

konigbrew.com

THE CIP

AVAILABLE OPTIONS

- Conductivity probe and analyzer
- Dosing system integration
- CIP return pump integration
- Custom sizes and vessel quantity layouts (larger vessels will not be skid mounted, but can be fully constructed in-house and disassembled for shipment)
- 316SS for wetted surfaces

FEATURES

- Fully skid mounted with adjustable foot pads
- Designed with minimal head space
- Standard sizes available: 100usg (375l), 200usg (750l), 10bbl (1173l) in both 2 or 3 vessel designs
- Power requirements: 230/460/575V, 3 Φ , 60Hz, 5 - 7.5hp (3.7 - 5.6kW)
- Three level of controls available: manual, semi-auto, full-auto
- Steam or Electric heating by recirculating through heat exchanger
- Vessel designed to maximum 250°F (122°C)
- Vessel design pressure: atmospheric
- Insulated with High-Temp PU foam
- All 304SS, #4 finish outside cladding, 2B inside
- Top mounted, non-pressure manway w/ vacuum relief

BENEFITS

- Safe dosing points
- All tanks can be heated via recirculating through steam or electric heat exchanger
- Holding tank for CIP solution reuse (reduced COD in effluent)
- Rinse water recovery reducing water usage
- Quick install for pre-piped skidded systems
